How to Play Two-Person Mah Jongg

1. Place all tiles face down in the center—no walls needed.
2. Each player uses two racks and plays two separate hands.
3. East begins with 28 tiles; the other player begins with 27.
4. Divide your tiles between your two racks however you choose.
5. East discards first.
6. Pick from one side of the center and discard to the opposite side.
7. You may move tiles between your two racks as you play.
8. Calls follow regular NMJL rules.
9. When one rack declares Mah Jongg, that hand is finished.
10. Jokers in a completed hand are locked and may not be exchanged.

Keep playing until another Mah Jongg is declared or the tiles run out.
